Session Stuff: <https://github.com/DarwinJS/PowerShellDevOpsSummit2018>

A decorative graphic on the left side of the slide featuring two interlocking gears, one light blue and one light red, with a red star in the center.

SESSION DEMOS

- Automated POC Setups for Artifactory, Nexus, ProGet
- Configuring Nexus
- Curating Packages From Chocolatey
- Curating Packages From PowerShellGallery
- Proxied Feeds
- Leveraging Dependencies for Customization
- Leveraging Feeds for Release Promotion
- And more...

FOSS Packages

Benefits

Great Source of Starter Packages

Many Directly Usable

Many Actively Maintained

Source of Packaging Automation Patterns

Automated QA / Virus Checking (choco)

Challenges

In-depth Configuration and Customization

QA Test Targeting and Variability

Timely Updates

Platform / Integration Targeting = Latest

Package Security

Curation of Public Packages

- Control Security
- Control Quality
- Guarantee Availability
- Improve Performance
- Reduce Cost
- Change Management

Package Managers: Shave Fewer Yaks

Decoupled & Encapsulated Automation Artifacts

Greatly Simplified Unit Testing

ANSIBLE

CHEF

puppet
labs

PowerShell

SCCM

Azure
Automation

Cloud
Formation

TeamCity

go

TFS

Octopus Deploy

Setup.exe

MSI

App.appx

Features

MSU

App.zip

App.exe

Auto.ps1

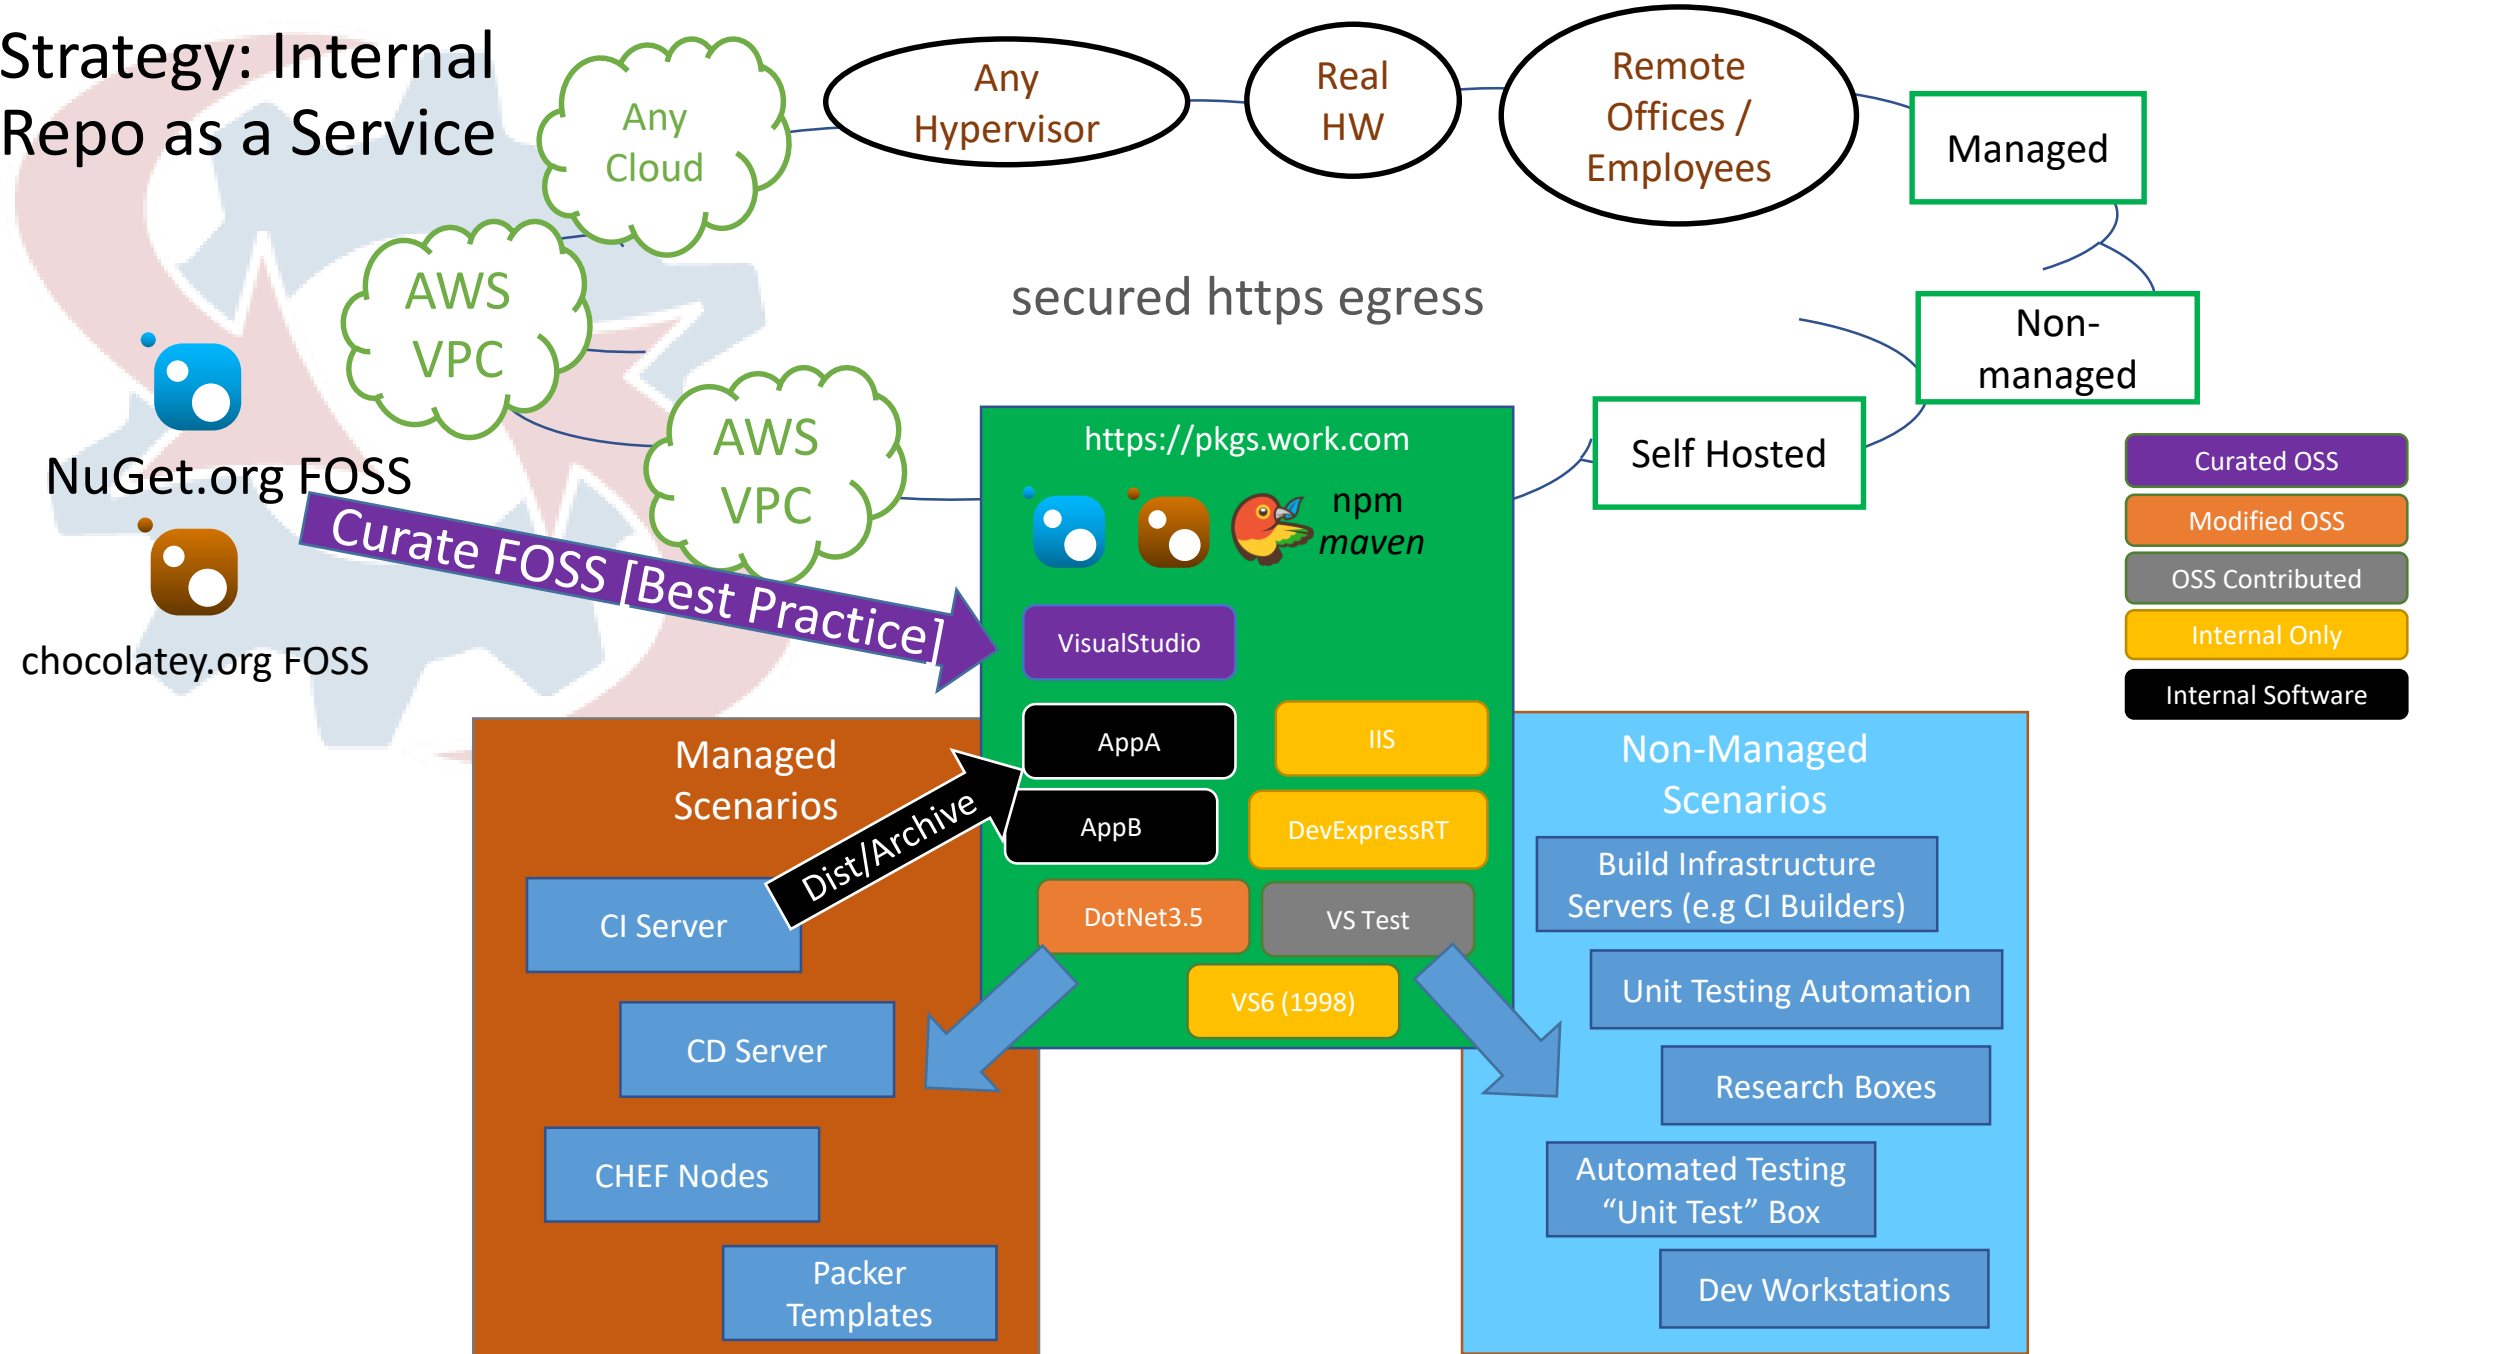

Shavings:

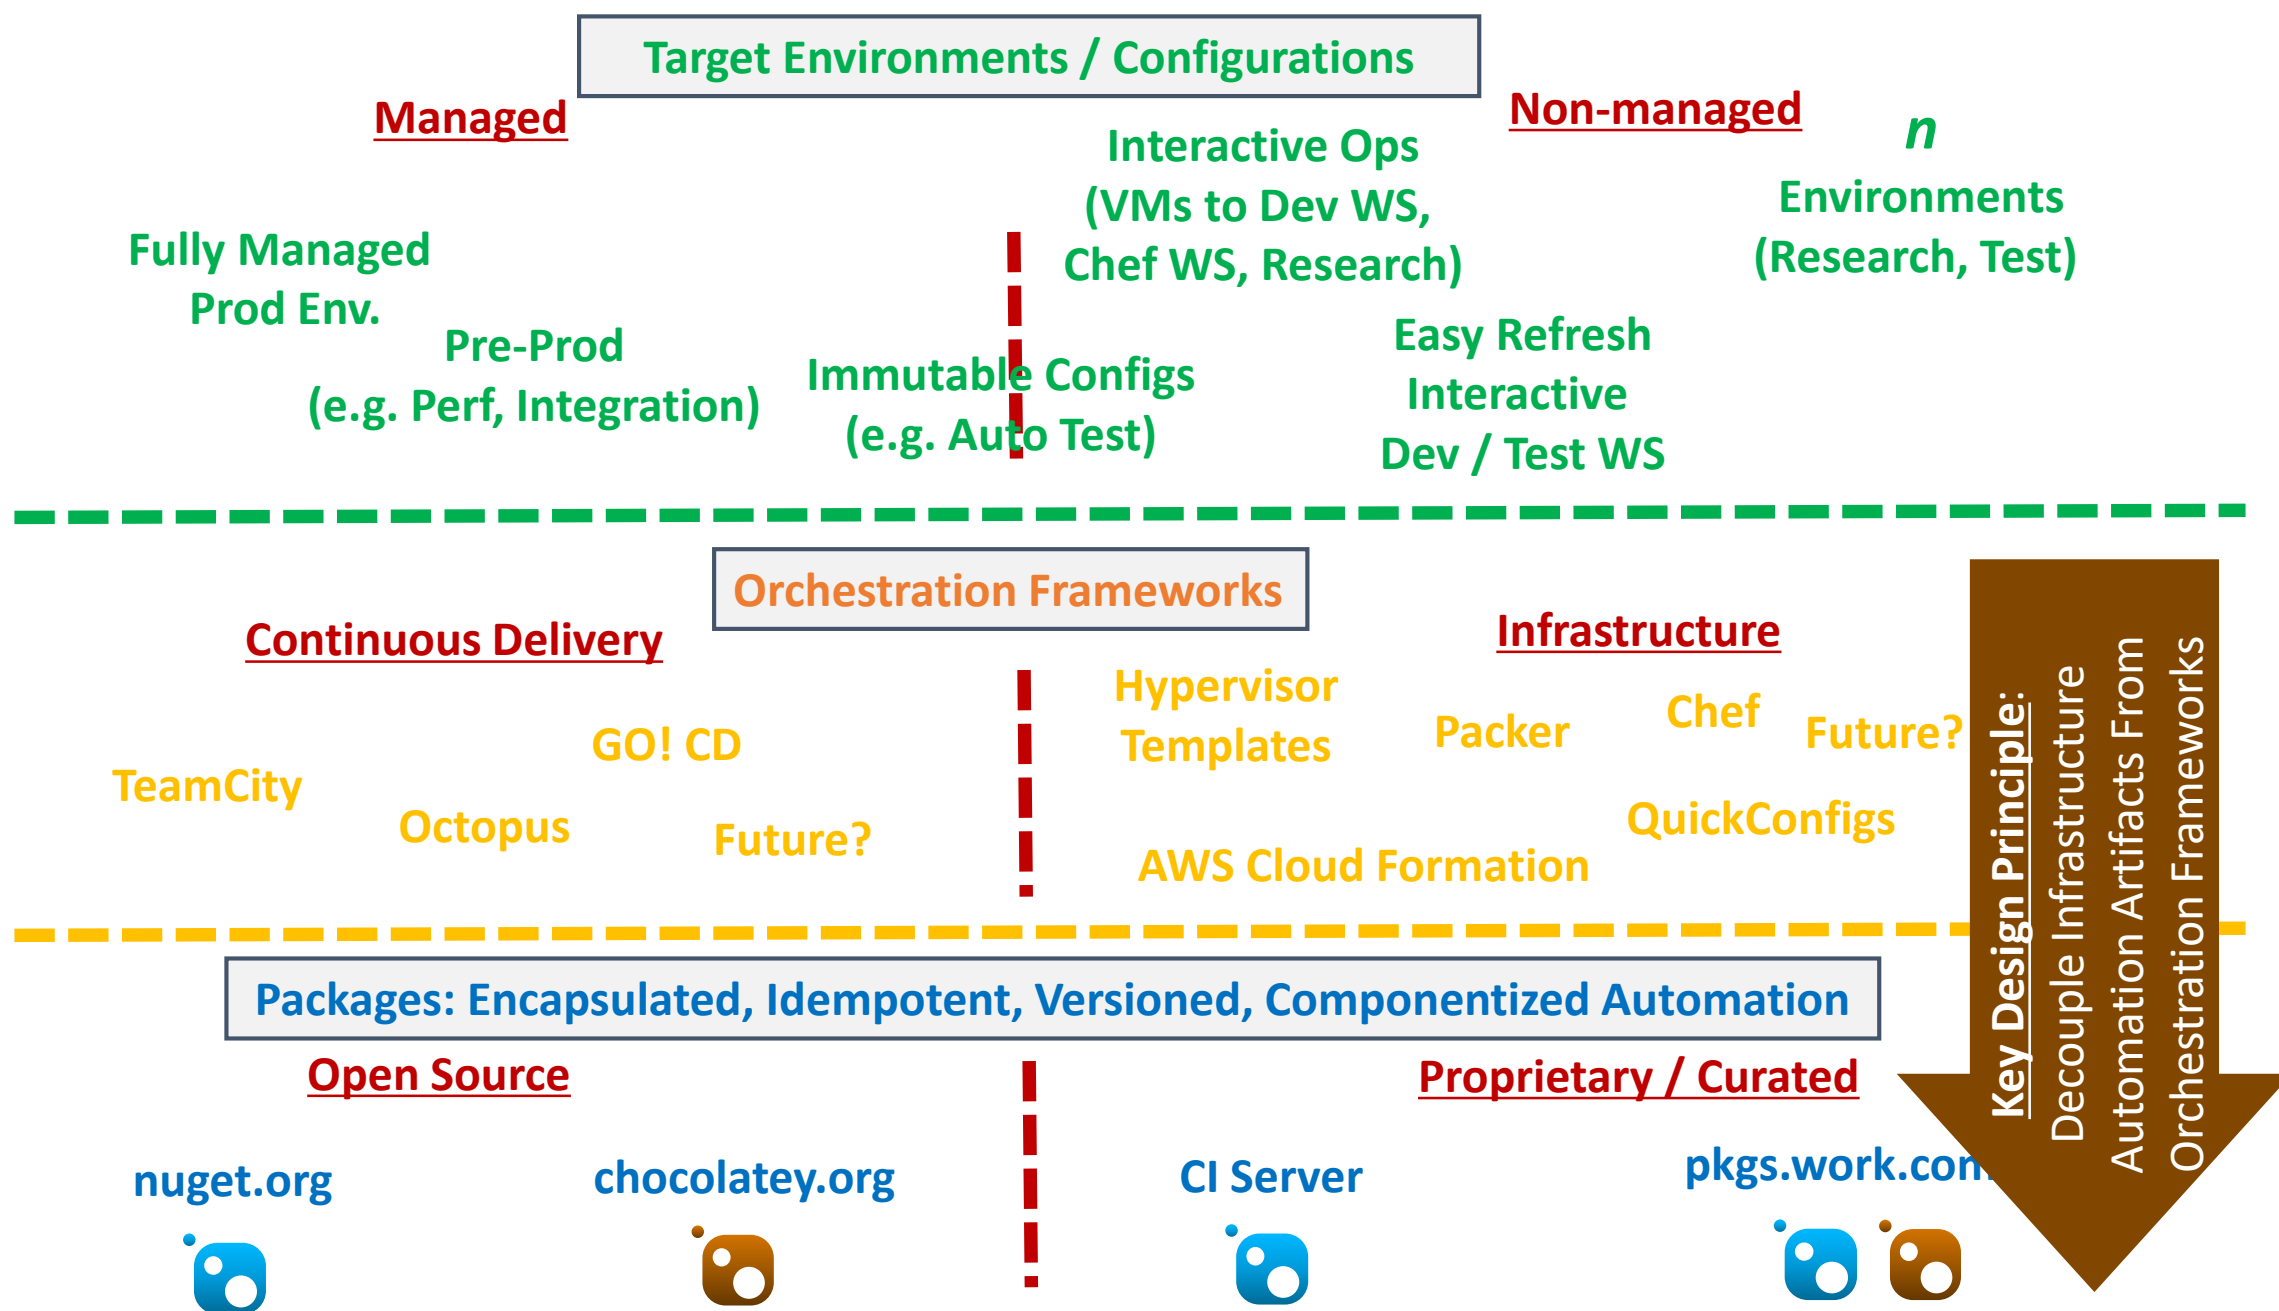

$$11 \times 8 = 88$$

$$11 \times 1 = 11$$

Strategy: Internal Repo as a Service

Strategy: Fast, Flexible, Modular Automation

THANK YOU!
